

Captaincy and Decisions Readiness and Workload Log - Build a Reliable Baseline

Captaincy and Decisions | Build a Reliable Baseline | Asset ID CRIC-22-08-01

Purpose: This original printable readiness and workload log helps players, coaches, clubs, schools and families work with captaincy and decisions while pursuing one defined outcome: understand the current skill before changing technique. Its method is to warm up progressively, stop for warning signs and seek qualified help when needed. Use the pages as a working record, not as a substitute for current competition rules, safe facilities, suitable equipment and qualified coaching or health guidance where those are needed.

Resource Map

The subject focus is to make transparent choices using conditions, resources and current match information. The six working areas below define the scope for this specific resource. Complete only the rows that matter to the present practice block, and date any observation that may change.

#	Working area	Current evidence	Next check
1	Toss Factors	Known / estimated / not checked	_____
2	Bowling Change	Known / estimated / not checked	_____
3	Field Change	Known / estimated / not checked	_____
4	Matchup Evidence	Known / estimated / not checked	_____
5	Communication	Known / estimated / not checked	_____
6	Review Point	Known / estimated / not checked	_____

Foundation Starting Brief

- Survey: Which evidence separates matchup evidence from communication in this case? Survey the present state before setting a target.
- Select: How does review point change the interpretation of toss factors? Select the smallest useful starting point.
- Bound: What boundary on bowling change must be checked before relying on field change? Bound the work by time, scope and available support.
- Prepare: Which observation links communication to bowling change, and what remains uncertain? Prepare the materials, conditions and owner.
- Begin: What alternative explanation could account for both toss factors and matchup evidence? Begin with one observable action.
- Edition success means: record several comparable attempts and a clear starting measure

Readiness and Workload Log

This format is designed to record preparation, effort, rest and discomfort without giving medical advice. For captaincy and decisions, apply the method in a deliberate sequence: warm up progressively, stop for warning signs and seek qualified help when needed. The edition target is build a reliable baseline, so each entry should show what was noticed, what was tried and what changed.

Working step	What to record	Evidence or source	Status
Survey Matchup Evidence	Which evidence separates matchup evidence from communication in this case?	Starting view / date	Open / checked
Select Communication	How does review point change the interpretation of toss factors?	First priority / date	Open / checked
Bound Review Point	What boundary on bowling change must be checked before relying on field change?	Boundary / date	Open / checked
Prepare Toss Factors	Which observation links communication to bowling change, and what remains uncertain?	Readiness / date	Open / checked
Begin Bowling Change	What alternative explanation could account for both toss factors and matchup evidence?	First result / date	Open / checked
Confirm Field Change	What next check on field change would make the record about review point more useful?	Foundation check / date	Open / checked

Completion Standard

- Keep the work tied to captaincy and decisions, not to a vague general intention.
- Apply this adjustment: use one repeatable drill at comfortable intensity
- Is the foundation small, clear and evidenced enough to continue?
- Expose this outcome risk if it appears: several actions start together.
- Use original notes and explanations; quote only when necessary, lawful and properly attributed.
- Ask a qualified coach, safeguarding lead or health professional to challenge one material assumption where appropriate.
- Close with one decision and one follow-up rather than an unranked list of ideas.

Working Note

Edition CRIC-22-08-01 pairs readiness and workload log with the outcome 'Build a Reliable Baseline'. That pairing is the boundary for this workbook: material that does not help that outcome belongs in a separate record.

Comparison x Foundation Focused Practice Lab

This lab pairs a comparison method with a foundation outcome lens. Work through the six actions to turn the subject focus - make transparent choices using conditions, resources and current match information - into evidence for build a reliable baseline. Preserve any gap that prevents a supported conclusion.

#	Action	Constraint	Record
1	Align / Survey bowling change	Which evidence separates matchup evidence from communication in this case? Survey the present state before setting a target.	Cases / Starting view
2	Compare / Select field change	How does review point change the interpretation of toss factors? Select the smallest useful starting point.	Alignment / First priority
3	Detect / Bound matchup evidence	What boundary on bowling change must be checked before relying on field change? Bound the work by time, scope and available support.	Difference / Boundary
4	Explain / Prepare communication	Which observation links communication to bowling change, and what remains uncertain? Prepare the materials, conditions and owner.	Explanation / Readiness
5	Judge / Begin review point	What alternative explanation could account for both toss factors and matchup evidence? Begin with one observable action.	Judgement / First result
6	Document / Confirm toss factors	What next check on field change would make the record about review point more useful? Confirm what is ready for the next cycle.	Decision / Foundation check

Common Failure Modes

- For bowling change, watch for the cases answer different questions together with the starting state is assumed.
- For field change, watch for units or dates do not align together with the first target is too large.
- For matchup evidence, watch for a difference is hidden by an average together with the scope has no boundary.
- For communication, watch for the explanation lacks evidence together with required support is missing.
- For review point, watch for fitness criteria change together with several actions start together.

Independent Review Question

Format question: Are the two cases comparable enough to support the stated choice? Outcome question: Is the foundation small, clear and evidenced enough to continue? Ask a qualified coach, safeguarding lead or health professional where appropriate, then answer before the next practice block: _____

Cricket Practice Plan for Build a Reliable Baseline

Use one defined practice block to test the outcome rather than attempting every possible task. This edition pairs comparison with foundation to pursue this objective: understand the current skill before changing technique. Preserve the starting condition and both evidence trails.

Plan field	Entry
Purpose	Build a Reliable Baseline
Starting condition	_____
Chosen working area	_____
Readiness	use one repeatable drill at comfortable intensity
Evidence to capture	_____
Stop or review condition	_____

Thirty Minute Practice Shape

Stage	Action	Evidence
0-5 min	Which evidence separates matchup evidence from communication in this case? Define the two cases and shared question.	Cases / Starting view
5-10 min	How does review point change the interpretation of toss factors? Align units, dates and conditions.	Alignment / First priority
10-18 min	What boundary on bowling change must be checked before relying on field change? Record meaningful differences.	Difference / Boundary
18-24 min	Which observation links communication to bowling change, and what remains uncertain? Investigate the likeliest explanation.	Explanation / Readiness
24-27 min	What alternative explanation could account for both toss factors and matchup evidence? Judge fitness for the intended use.	Judgement / First result
27-30 min	What next check on field change would make the record about review point more useful? Document the choice and limitation.	Decision / Foundation check

Comparison Case Log

Comparis on Case	Condition	Observation	Decision
1	Same / changed	_____	Keep / change / check
2	Same / changed	_____	Keep / change / check
3	Same / changed	_____	Keep / change / check
4	Same / changed	_____	Keep / change / check
5	Same / changed	_____	Keep / change / check

Controlled Case Comparison - Foundation Lens

This comparison tests captaincy and decisions against build a reliable baseline through two independent questions. Format: Are the two cases comparable enough to support the stated choice? Outcome: Is the foundation small, clear and evidenced enough to continue? Record material setting differences instead of averaging them away.

Evidence area	Baseline	Alternative	Interpretation prompt
Field Change	_____	_____	Which evidence separates match up evidence from communication in this case?
Matchup Evidence	_____	_____	How does review point change the interpretation of toss factors?
Communication	_____	_____	What boundary on bowling change must be checked before relying on field change?
Review Point	_____	_____	Which observation links communication to bowling change, and what remains uncertain?
Toss Factors	_____	_____	What alternative explanation could account for both toss factors and matchup evidence?
Bowling Change	_____	_____	What next check on field change would make the record about review point more useful?

Format Decision Test

Field	Record
Review question	Are the two cases comparable enough to support the stated choice?
Outcome question	Is the foundation small, clear and evidenced enough to continue?
Acceptance lens	record several comparable attempts and a clear starting measure
Conditions held steady	_____
Evidence supporting the choice	_____
Evidence against the choice	_____

Comparison Confidence Check

- Starting view: what was actually seen, heard, measured or read?
- Format evidence: which record best demonstrates conditions aligned?
- Outcome evidence: which record best demonstrates first actions completed?
- Challenge: could the scope has no boundary explain the result?
- Subject boundary: what does this comparison leave unresolved about matchup evidence?

Comparison x Foundation Scenario Cards

Use these paired scenarios to rehearse judgement for build a reliable baseline. Each card joins a comparison failure mode to an outcome-specific risk. State what remains open and which evidence named in the final column should be collected next.

#	Situation	Review question	Decision
1	Matchup Evidence: units or dates do not align.	Which evidence separates matchup evidence from communication in this case?	Starting view
2	Communication: a difference is hidden by an average.	How does review point change the interpretation of toss factors?	First priority
3	Review Point: the explanation lacks evidence.	What boundary on bowling change must be checked before relying on field change?	Boundary
4	Toss Factors: fitness criteria change.	Which observation links communication to bowling change, and what remains uncertain?	Readiness
5	Bowling Change: the losing option is not documented.	What alternative explanation could account for both toss factors and matchup evidence?	First result
6	Field Change: the cases answer different questions.	What next check on field change would make the record about review point more useful?	Foundation check

Decision Record

Field	Notes
Chosen format scenario	_____
Outcome lens	Is the foundation small, clear and evidenced enough to continue?
Evidence available	_____
Evidence missing	_____
Controlled next step	_____
Person / review date	_____

Eight Comparison and Foundation Evidence Tracker

Track build a reliable baseline across eight practice blocks using the comparison method and the foundation outcome lens. Keep conditions visible and use this review question: Is the foundation small, clear and evidenced enough to continue?

#	Focus	Condition	Result	Next action
1	Matchup Evidence	_____	_____	_____
2	Communication	_____	_____	_____
3	Review Point	_____	_____	_____
4	Toss Factors	_____	_____	_____
5	Bowling Change	_____	_____	_____
6	Field Change	_____	_____	_____
7	Matchup Evidence	_____	_____	_____
8	Communication	_____	_____	_____

Comparison Evidence Dashboard

Measure	Baseline	Current	Evidence location
Toss Factors: Cases Defined / Starting Conditions Recorded	_____	_____	_____
Bowling Change: Conditions Aligned / First Priority Selected	_____	_____	_____
Field Change: Differences Recorded / Scope Boundaries Stated	_____	_____	_____
Matchup Evidence: Explanations Tested / Readiness Items Confirmed	_____	_____	_____
Communication: Criteria Applied / First Actions Completed	_____	_____	_____
Review Point: Choices Documented / Next Cycles Approved	_____	_____	_____

Interpret the Trend

- I recorded a real starting point rather than an idealised one.
- I chose a first step that can be checked before the work expands.
- Keep the method only when the evidence for build a reliable baseline improves without hiding the scope has no boundary.
- How does review point change the interpretation of toss factors?
- Use a qualified coach, safeguarding lead or health professional when the evidence crosses a safety, rights, health or authority boundary.

Comparison x Foundation Next Step Plan

Finish by turning the paired format and outcome record into one owned action. For this readiness and workload log, the intended result was build a reliable baseline; the outcome test is: Is the foundation small, clear and evidenced enough to continue? The close-out standard remains: record several comparable attempts and a clear starting measure.

Close-out field	Record
Most useful evidence	_____
Important limitation	_____
Decision	Keep / adapt / pause / seek review
Next action	_____
Owner and date	_____
Evidence location	_____

Completion Review

- Subject check: Which evidence separates matchup evidence from communication in this case?
- Subject check: How does review point change the interpretation of toss factors?
- Format check: I aligned the cases before comparing their results.
- Outcome check: I recorded a real starting point rather than an idealised one.
- I used a progressive warm-up and did not ignore pain, unsafe surfaces, heat or fatigue.
- I kept the drill generic and did not imply affiliation with a player, team, league or governing body.

Originality and Responsible Use

Original independent resource. This general practice, observation and review aid was written specifically for asset CRIC-22-08-01. It does not reproduce a book passage, manual, official form, commercial question bank, branded training plan, broadcast, photograph, logo, artwork, map, proprietary diagram or third-party worksheet. Any user-added quotation, image, question or source material remains the user's responsibility and may require attribution or permission.

Educational use only. Verify current facts, rules, competition requirements, local regulations, health and safety conditions with authoritative sources and a suitably qualified person where consequences matter. This workbook does not grant approval, certification, legal rights or permission to use third-party material.
