

Captaincy and Decisions Performance Journal - Increase Accuracy

Captaincy and Decisions | Increase Accuracy | Asset ID CRIC-22-10-03

Purpose: This original printable performance journal helps players, coaches, clubs, schools and families work with captaincy and decisions while pursuing one defined outcome: direct the ball toward a useful target with stable mechanics. Its method is to record context, best evidence, one limitation and one next action. Use the pages as a working record, not as a substitute for current competition rules, safe facilities, suitable equipment and qualified coaching or health guidance where those are needed.

Resource Map

The subject focus is to make transparent choices using conditions, resources and current match information. The six working areas below define the scope for this specific resource. Complete only the rows that matter to the present practice block, and date any observation that may change.

#	Working area	Current evidence	Next check
1	Toss Factors	Known / estimated / not checked	_____
2	Bowling Change	Known / estimated / not checked	_____
3	Field Change	Known / estimated / not checked	_____
4	Matchup Evidence	Known / estimated / not checked	_____
5	Communication	Known / estimated / not checked	_____
6	Review Point	Known / estimated / not checked	_____

Precision Starting Brief

- Define: Which evidence separates bowling change from field change in this case? Define the target so two people would recognise the same result.
- Align: How does matchup evidence change the interpretation of communication? Align the units, conditions and acceptance rule.
- Attempt: What boundary on review point must be checked before relying on toss factors? Attempt the task without moving the standard.
- Capture: Which observation links field change to review point, and what remains uncertain? Capture misses as carefully as successes.
- Refine: What alternative explanation could account for both communication and bowling change? Refine one source of avoidable variation.
- Edition success means: improve the share of attempts reaching the target area

Performance Journal

This format is designed to preserve evidence, learning and the next small target after play. For captaincy and decisions, apply the method in a deliberate sequence: record context, best evidence, one limitation and one next action. The edition target is increase accuracy, so each entry should show what was noticed, what was tried and what changed.

Working step	What to record	Evidence or source	Status
Define Bowling Change	Which evidence separates bowling change from field change in this case?	Target definition / date	Open / checked
Align Field Change	How does matchup evidence change the interpretation of communication?	Test setup / date	Open / checked
Attempt Matchup Evidence	What boundary on review point must be checked before relying on toss factors?	Observed attempt / date	Open / checked
Capture Communication	Which observation links field change to review point, and what remains uncertain?	Error record / date	Open / checked
Refine Review Point	What alternative explanation could account for both communication and bowling change?	Precision change / date	Open / checked
Repeat Toss Factors	What next check on toss factors would make the record about matchup evidence more useful?	Repeatability check / date	Open / checked

Completion Standard

- Keep the work tied to captaincy and decisions, not to a vague general intention.
- Apply this adjustment: reduce effort, mark the target and count every attempt
- Can the claimed improvement be repeated under the stated conditions?
- Expose this outcome risk if it appears: the refinement changes several variables.
- Use original notes and explanations; quote only when necessary, lawful and properly attributed.
- Ask a qualified coach, safeguarding lead or health professional to challenge one material assumption where appropriate.
- Close with one decision and one follow-up rather than an unranked list of ideas.

Working Note

Edition CRIC-22-10-03 pairs performance journal with the outcome 'Increase Accuracy'. That pairing is the boundary for this workbook: material that does not help that outcome belongs in a separate record.

Reflective Practice x Precision Focused Practice Lab

This lab pairs a reflective practice method with a precision outcome lens. Work through the six actions to turn the subject focus - make transparent choices using conditions, resources and current match information - into evidence for increase accuracy. Preserve any gap that prevents a supported conclusion.

#	Action	Constraint	Record
1	Intend / Define matchup evidence	Which evidence separates bowling change from field change in this case? Define the target so two people would recognise the same result.	Intention / Target definition
2	Record / Align communication	How does matchup evidence change the interpretation of communication? Align the units, conditions and acceptance rule.	Record / Test setup
3	Notice / Attempt review point	What boundary on review point must be checked before relying on toss factors? Attempt the task without moving the standard.	Observation / Observed attempt
4	Interpret / Capture toss factors	Which observation links field change to review point, and what remains uncertain? Capture misses as carefully as successes.	Meaning / Error record
5	Synthesize / Refine bowling change	What alternative explanation could account for both communication and bowling change? Refine one source of avoidable variation.	Learning / Precision change
6	Commit / Repeat field change	What next check on toss factors would make the record about matchup evidence more useful? Repeat under comparable conditions.	Commitment / Repeatability check

Common Failure Modes

- For matchup evidence, watch for the intention is too vague together with the target is subjective.
- For communication, watch for the record omits an uncomfortable result together with units or conditions do not align.
- For review point, watch for a detail is overinterpreted together with the standard moves after the attempt.
- For toss factors, watch for context is ignored together with misses are omitted.
- For bowling change, watch for the lesson is too broad together with the refinement changes several variables.

Independent Review Question

Format question: Which lesson is supported by the record, and which part remains personal interpretation? Outcome question: Can the claimed improvement be repeated under the stated conditions? Ask a qualified coach, safeguarding lead or health professional where appropriate, then answer before the next practice block: _____

Cricket Practice Plan for Increase Accuracy

Use one defined practice block to test the outcome rather than attempting every possible task. This edition pairs reflective practice with precision to pursue this objective: direct the ball toward a useful target with stable mechanics. Preserve the starting condition and both evidence trails.

Plan field	Entry
Purpose	Increase Accuracy
Starting condition	_____
Chosen working area	_____
Error record	reduce effort, mark the target and count every attempt
Evidence to capture	_____
Stop or review condition	_____

Thirty Minute Practice Shape

Stage	Action	Evidence
0-5 min	Which evidence separates bowling change from field change in this case? Set one honest intention.	Intention / Target definition
5-10 min	How does matchup evidence change the interpretation of communication? Record what happened without polishing it.	Record / Test setup
10-18 min	What boundary on review point must be checked before relying on toss factors? Notice a meaningful detail or pattern.	Observation / Observed attempt
18-24 min	Which observation links field change to review point, and what remains uncertain? Interpret it alongside context.	Meaning / Error record
24-27 min	What alternative explanation could account for both communication and bowling change? Synthesize one transferable lesson.	Learning / Precision change
27-30 min	What next check on toss factors would make the record about matchup evidence more useful? Commit to a small next action.	Commitment / Repeatability check

Reflection Entry Log

Reflection Entry	Condition	Observation	Decision
1	Same / changed	_____	Keep / change / check
2	Same / changed	_____	Keep / change / check
3	Same / changed	_____	Keep / change / check
4	Same / changed	_____	Keep / change / check
5	Same / changed	_____	Keep / change / check

Experience and Learning Review - Precision Lens

This comparison tests captaincy and decisions against increase accuracy through two independent questions. Format: Which lesson is supported by the record, and which part remains personal interpretation? Outcome: Can the claimed improvement be repeated under the stated conditions? Record material setting differences instead of averaging them away.

Evidence area	Baseline	Alternative	Interpretation prompt
Communication	_____	_____	Which evidence separates bowling change from field change in this case?
Review Point	_____	_____	How does matchup evidence change the interpretation of communication?
Toss Factors	_____	_____	What boundary on review point must be checked before relying on toss factors?
Bowling Change	_____	_____	Which observation links field change to review point, and what remains uncertain?
Field Change	_____	_____	What alternative explanation could account for both communication and bowling change?
Matchup Evidence	_____	_____	What next check on toss factors would make the record about matchup evidence more useful?

Format Decision Test

Field	Record
Review question	Which lesson is supported by the record, and which part remains personal interpretation?
Outcome question	Can the claimed improvement be repeated under the stated conditions?
Acceptance lens	improve the share of attempts reaching the target area
Conditions held steady	_____
Evidence supporting the choice	_____
Evidence against the choice	_____

Reflective Practice Confidence Check

- Target definition: what was actually seen, heard, measured or read?
- Format evidence: which record best demonstrates context considered?
- Outcome evidence: which record best demonstrates variations reduced?
- Challenge: could the refinement changes several variables explain the result?
- Subject boundary: what does this comparison leave unresolved about bowling change?

Reflective Practice x Precision Scenario Cards

Use these paired scenarios to rehearse judgement for increase accuracy. Each card joins a reflective practice failure mode to an outcome-specific risk. State what remains open and which evidence named in the final column should be collected next.

#	Situation	Review question	Decision
1	Bowling Change: context is ignored.	Which evidence separates bowling change from field change in this case?	Target definition
2	Field Change: the lesson is too broad.	How does matchup evidence change the interpretation of communication?	Test setup
3	Matchup Evidence: the next action is not owned.	What boundary on review point must be checked before relying on toss factors?	Observed attempt
4	Communication: the intention is too vague.	Which observation links field change to review point, and what remains uncertain?	Error record
5	Review Point: the record omits an uncomfortable result.	What alternative explanation could account for both communication and bowling change?	Precision change
6	Toss Factors: a detail is overinterpreted.	What next check on toss factors would make the record about matchup evidence more useful?	Repeatability check

Decision Record

Field	Notes
Chosen format scenario	_____
Outcome lens	Can the claimed improvement be repeated under the stated conditions?
Evidence available	_____
Evidence missing	_____
Controlled next step	_____
Person / review date	_____

Eight Reflective Practice and Precision Evidence Tracker

Track increase accuracy across eight practice blocks using the reflective practice method and the precision outcome lens. Keep conditions visible and use this review question: Can the claimed improvement be repeated under the stated conditions?

#	Focus	Condition	Result	Next action
1	Review Point	_____	_____	_____
2	Toss Factors	_____	_____	_____
3	Bowling Change	_____	_____	_____
4	Field Change	_____	_____	_____
5	Matchup Evidence	_____	_____	_____
6	Communication	_____	_____	_____
7	Review Point	_____	_____	_____
8	Toss Factors	_____	_____	_____

Reflective Practice Evidence Dashboard

Measure	Baseline	Current	Evidence location
Toss Factors: Intentions Recorded / Targets Defined	_____	_____	_____
Bowling Change: Entries Completed / Conditions Aligned	_____	_____	_____
Field Change: Patterns Noticed / Attempts Completed	_____	_____	_____
Matchup Evidence: Context Considered / Misses Captured	_____	_____	_____
Communication: Lessons Bounded / Variations Reduced	_____	_____	_____
Review Point: Commitments Completed / Repeatable Results Recorded	_____	_____	_____

Interpret the Trend

- I defined the target before observing the result.
- I counted misses, skips and uncertain results as well as successes.
- Keep the method only when the evidence for increase accuracy improves without hiding the refinement changes several variables.
- Which observation links field change to review point, and what remains uncertain?
- Use a qualified coach, safeguarding lead or health professional when the evidence crosses a safety, rights, health or authority boundary.

Reflective Practice x Precision Next Step Plan

Finish by turning the paired format and outcome record into one owned action. For this performance journal, the intended result was increase accuracy; the outcome test is: Can the claimed improvement be repeated under the stated conditions? The close-out standard remains: improve the share of attempts reaching the target area.

Close-out field	Record
Most useful evidence	_____
Important limitation	_____
Decision	Keep / adapt / pause / seek review
Next action	_____
Owner and date	_____
Evidence location	_____

Completion Review

- Subject check: Which evidence separates bowling change from field change in this case?
- Subject check: How does matchup evidence change the interpretation of communication?
- Format check: I preserved an honest record, including evidence that challenged my first view.
- Outcome check: I defined the target before observing the result.
- I used a progressive warm-up and did not ignore pain, unsafe surfaces, heat or fatigue.
- I kept the drill generic and did not imply affiliation with a player, team, league or governing body.

Originality and Responsible Use

Original independent resource. This general practice, observation and review aid was written specifically for asset CRIC-22-10-03. It does not reproduce a book passage, manual, official form, commercial question bank, branded training plan, broadcast, photograph, logo, artwork, map, proprietary diagram or third-party worksheet. Any user-added quotation, image, question or source material remains the user's responsibility and may require attribution or permission.

Educational use only. Verify current facts, rules, competition requirements, local regulations, health and safety conditions with authoritative sources and a suitably qualified person where consequences matter. This workbook does not grant approval, certification, legal rights or permission to use third-party material.
