

Ground Fielding Practice Session Planner - Plan a Match Scenario

Ground Fielding | Plan a Match Scenario | Asset ID CRIC-19-02-08

Purpose: This original printable practice session planner helps players, coaches, clubs, schools and families work with ground fielding while pursuing one defined outcome: turn scoreboard and resources into a bounded tactical plan. Its method is to prepare, practise in blocks, record evidence and cool down. Use the pages as a working record, not as a substitute for current competition rules, safe facilities, suitable equipment and qualified coaching or health guidance where those are needed.

Resource Map

The subject focus is to close space, stay balanced and choose a collection method suited to the ball. The six working areas below define the scope for this specific resource. Complete only the rows that matter to the present practice block, and date any observation that may change.

#	Working area	Current evidence	Next check
1	Approach Angle	Known / estimated / not checked	_____
2	Body Height	Known / estimated / not checked	_____
3	Two-Hand Pickup	Known / estimated / not checked	_____
4	One-Hand Pickup	Known / estimated / not checked	_____
5	Clean Transfer	Known / estimated / not checked	_____
6	Throw Decision	Known / estimated / not checked	_____

Scenario and Facilitation Starting Brief

- Frame: Which evidence separates clean transfer from throw decision in this case? Frame a bounded scenario with a clear success measure.
- Assign: How does approach angle change the interpretation of body height? Assign roles, resources and stop conditions.
- Run: What boundary on two-hand pickup must be checked before relying on one-hand pickup? Run the scenario without adding hidden rules.
- Capture: Which observation links throw decision to two-hand pickup, and what remains uncertain? Capture decisions, timing and exceptions.
- Debrief: What alternative explanation could account for both body height and clean transfer? Debrief actions with evidence and balanced participation.
- Edition success means: run and review the scenario with a reason for each adjustment

Practice Session Planner

This format is designed to organise warm-up, focused drills, rest and review around one goal. For ground fielding, apply the method in a deliberate sequence: prepare, practise in blocks, record evidence and cool down. The edition target is plan a match scenario, so each entry should show what was noticed, what was tried and what changed.

Working step	What to record	Evidence or source	Status
Frame Clean Transfer	Which evidence separates clean transfer from throw decision in this case?	Scenario brief / date	Open / checked
Assign Throw Decision	How does approach angle change the interpretation of body height?	Role map / date	Open / checked
Run Approach Angle	What boundary on two-hand pickup must be checked before relying on one-hand pickup?	Scenario run / date	Open / checked
Capture Body Height	Which observation links throw decision to two-hand pickup, and what remains uncertain?	Event record / date	Open / checked
Debrief Two-Hand Pickup	What alternative explanation could account for both body height and clean transfer?	Debrief / date	Open / checked
Transfer One-Hand Pickup	What next check on one-hand pickup would make the record about approach angle more useful?	Transfer plan / date	Open / checked

Completion Standard

- Keep the work tied to ground fielding, not to a vague general intention.
- Apply this adjustment: define the situation, roles, field and success measure
- Which decision from the scenario should change the next real attempt?
- Expose this outcome risk if it appears: roles or stop conditions are unclear.
- Use original notes and explanations; quote only when necessary, lawful and properly attributed.
- Ask a qualified coach, safeguarding lead or health professional to challenge one material assumption where appropriate.
- Close with one decision and one follow-up rather than an unranked list of ideas.

Working Note

Edition CRIC-19-02-08 pairs practice session planner with the outcome 'Plan a Match Scenario'. That pairing is the boundary for this workbook: material that does not help that outcome belongs in a separate record.

Evidence x Scenario and Facilitation Focused Practice Lab

This lab pairs a evidence method with a scenario and facilitation outcome lens. Work through the six actions to turn the subject focus - close space, stay balanced and choose a collection method suited to the ball - into evidence for plan a match scenario. Preserve any gap that prevents a supported conclusion.

#	Action	Constraint	Record
1	Collect / Frame two-hand pickup	Which evidence separates clean transfer from throw decision in this case? Frame a bounded scenario with a clear success measure.	Evidence list / Scenario brief
2	Classify / Assign one-hand pickup	How does approach angle change the interpretation of body height? Assign roles, resources and stop conditions.	Source / Role map
3	Trace / Run clean transfer	What boundary on two-hand pickup must be checked before relying on one-hand pickup? Run the scenario without adding hidden rules.	Trace / Scenario run
4	Verify / Capture throw decision	Which observation links throw decision to two-hand pickup, and what remains uncertain? Capture decisions, timing and exceptions.	Verification / Event record
5	Reconcile / Debrief approach angle	What alternative explanation could account for both body height and clean transfer? Debrief actions with evidence and balanced participation.	Exception / Debrief
6	Approve / Transfer body height	What next check on one-hand pickup would make the record about approach angle more useful? Transfer the learning into the next owned action.	Sign-off / Transfer plan

Common Failure Modes

- For two-hand pickup, watch for the source has no date together with the scenario lacks a boundary.
- For one-hand pickup, watch for the evidence is second-hand together with roles or stop conditions are unclear.
- For clean transfer, watch for two records disagree together with hidden rules appear during the run.
- For throw decision, watch for a value lacks units together with only the final result is captured.
- For approach angle, watch for the context has changed together with the debrief becomes blame.

Independent Review Question

Format question: Which source is strongest for this decision, and what limitation remains? Outcome question: Which decision from the scenario should change the next real attempt? Ask a qualified coach, safeguarding lead or health professional where appropriate, then answer before the next practice block: _____

Cricket Practice Plan for Plan a Match Scenario

Use one defined practice block to test the outcome rather than attempting every possible task. This edition pairs evidence with scenario and facilitation to pursue this objective: turn scoreboard and resources into a bounded tactical plan. Preserve the starting condition and both evidence trails.

Plan field	Entry
Purpose	Plan a Match Scenario
Starting condition	_____
Chosen working area	_____
Event record	define the situation, roles, field and success measure
Evidence to capture	_____
Stop or review condition	_____

Thirty Minute Practice Shape

Stage	Action	Evidence
0-5 min	Which evidence separates clean transfer from throw decision in this case? Identify the evidence required.	Evidence list / Scenario brief
5-10 min	How does approach angle change the interpretation of body height? Collect one traceable record.	Source / Role map
10-18 min	What boundary on two-hand pickup must be checked before relying on one-hand pickup? Label its date, owner and context.	Trace / Scenario run
18-24 min	Which observation links throw decision to two-hand pickup, and what remains uncertain? Cross-check the material independently.	Verification / Event record
24-27 min	What alternative explanation could account for both body height and clean transfer? Resolve or expose one gap.	Exception / Debrief
27-30 min	What next check on one-hand pickup would make the record about approach angle more useful? Record the supported conclusion.	Sign-off / Transfer plan

Evidence Record Log

Evidence Record	Condition	Observation	Decision
1	Same / changed	_____	Keep / change / check
2	Same / changed	_____	Keep / change / check
3	Same / changed	_____	Keep / change / check
4	Same / changed	_____	Keep / change / check
5	Same / changed	_____	Keep / change / check

Source and Evidence Reconciliation - Scenario and Facilitation Lens

This comparison tests ground fielding against plan a match scenario through two independent questions. Format: Which source is strongest for this decision, and what limitation remains? Outcome: Which decision from the scenario should change the next real attempt? Record material setting differences instead of averaging them away.

Evidence area	Baseline	Alternative	Interpretation prompt
Two-Hand Pickup	_____	_____	Which evidence separates clean transfer from throw decision in this case?
One-Hand Pickup	_____	_____	How does approach angle change the interpretation of body height?
Clean Transfer	_____	_____	What boundary on two-hand pickup must be checked before relying on one-hand pickup?
Throw Decision	_____	_____	Which observation links throw decision to two-hand pickup, and what remains uncertain?
Approach Angle	_____	_____	What alternative explanation could account for both body height and clean transfer?
Body Height	_____	_____	What next check on one-hand pickup would make the record about approach angle more useful?

Format Decision Test

Field	Record
Review question	Which source is strongest for this decision, and what limitation remains?
Outcome question	Which decision from the scenario should change the next real attempt?
Acceptance lens	run and review the scenario with a reason for each adjustment
Conditions held steady	_____
Evidence supporting the choice	_____
Evidence against the choice	_____

Evidence Confidence Check

- Scenario brief: what was actually seen, heard, measured or read?
- Format evidence: which record best demonstrates records traced?
- Outcome evidence: which record best demonstrates roles assigned?
- Challenge: could hidden rules appear during the run explain the result?
- Subject boundary: what does this comparison leave unresolved about clean transfer?

Evidence x Scenario and Facilitation Scenario Cards

Use these paired scenarios to rehearse judgement for plan a match scenario. Each card joins a evidence failure mode to an outcome-specific risk. State what remains open and which evidence named in the final column should be collected next.

#	Situation	Review question	Decision
1	Clean Transfer: two records disagree.	Which evidence separates clean transfer from throw decision in this case?	Scenario brief
2	Throw Decision: a value lacks units.	How does approach angle change the interpretation of body height?	Role map
3	Approach Angle: the context has changed.	What boundary on two-hand pickup must be checked before relying on one-hand pickup?	Scenario run
4	Body Height: approval is missing.	Which observation links throw decision to two-hand pickup, and what remains uncertain?	Event record
5	Two-Hand Pickup: the source has no date.	What alternative explanation could account for both body height and clean transfer?	Debrief
6	One-Hand Pickup: the evidence is second-hand.	What next check on one-hand pickup would make the record about approach angle more useful?	Transfer plan

Decision Record

Field	Notes
Chosen format scenario	_____
Outcome lens	Which decision from the scenario should change the next real attempt?
Evidence available	_____
Evidence missing	_____
Controlled next step	_____
Person / review date	_____

Eight Evidence and Scenario and Facilitation Evidence Tracker

Track plan a match scenario across eight practice blocks using the evidence method and the scenario and facilitation outcome lens. Keep conditions visible and use this review question: Which decision from the scenario should change the next real attempt?

#	Focus	Condition	Result	Next action
1	One-Hand Pickup	_____	_____	_____
2	Clean Transfer	_____	_____	_____
3	Throw Decision	_____	_____	_____
4	Approach Angle	_____	_____	_____
5	Body Height	_____	_____	_____
6	Two-Hand Pickup	_____	_____	_____
7	One-Hand Pickup	_____	_____	_____
8	Clean Transfer	_____	_____	_____

Evidence Evidence Dashboard

Measure	Baseline	Current	Evidence location
Approach Angle: Sources Identified / Scenarios Framed	_____	_____	_____
Body Height: Dates Captured / Roles Assigned	_____	_____	_____
Two-Hand Pickup: Records Traced / Runs Completed	_____	_____	_____
One-Hand Pickup: Cross-Checks Completed / Events Captured	_____	_____	_____
Clean Transfer: Exceptions Resolved / Debriefs Evidenced	_____	_____	_____
Throw Decision: Conclusions Supported / Learning Transferred	_____	_____	_____

Interpret the Trend

- I kept the scenario rules and success measure visible throughout the run.
- I converted the debrief into a specific action with an owner.
- Keep the method only when the evidence for plan a match scenario improves without hiding hidden rules appear during the run.
- What boundary on two-hand pickup must be checked before relying on one-hand pickup?
- Use a qualified coach, safeguarding lead or health professional when the evidence crosses a safety, rights, health or authority boundary.

Evidence x Scenario and Facilitation Next Step Plan

Finish by turning the paired format and outcome record into one owned action. For this practice session planner, the intended result was plan a match scenario; the outcome test is: Which decision from the scenario should change the next real attempt? The close-out standard remains: run and review the scenario with a reason for each adjustment.

Close-out field	Record
Most useful evidence	_____
Important limitation	_____
Decision	Keep / adapt / pause / seek review
Next action	_____
Owner and date	_____
Evidence location	_____

Completion Review

- Subject check: Which evidence separates clean transfer from throw decision in this case?
- Subject check: How does approach angle change the interpretation of body height?
- Format check: I left disputed or missing evidence visibly unresolved.
- Outcome check: I converted the debrief into a specific action with an owner.
- I used a progressive warm-up and did not ignore pain, unsafe surfaces, heat or fatigue.
- I kept the drill generic and did not imply affiliation with a player, team, league or governing body.

Originality and Responsible Use

Original independent resource. This general practice, observation and review aid was written specifically for asset CRIC-19-02-08. It does not reproduce a book passage, manual, official form, commercial question bank, branded training plan, broadcast, photograph, logo, artwork, map, proprietary diagram or third-party worksheet. Any user-added quotation, image, question or source material remains the user's responsibility and may require attribution or permission.

Educational use only. Verify current facts, rules, competition requirements, local regulations, health and safety conditions with authoritative sources and a suitably qualified person where consequences matter. This workbook does not grant approval, certification, legal rights or permission to use third-party material.
