

Ground Fielding Technique Observation Worksheet - Plan a Match Scenario

Ground Fielding | Plan a Match Scenario | Asset ID CRIC-19-03-08

Purpose: This original printable technique observation worksheet helps players, coaches, clubs, schools and families work with ground fielding while pursuing one defined outcome: turn scoreboard and resources into a bounded tactical plan. Its method is to watch from a safe position, note one cue and compare repeated attempts. Use the pages as a working record, not as a substitute for current competition rules, safe facilities, suitable equipment and qualified coaching or health guidance where those are needed.

Resource Map

The subject focus is to close space, stay balanced and choose a collection method suited to the ball. The six working areas below define the scope for this specific resource. Complete only the rows that matter to the present practice block, and date any observation that may change.

#	Working area	Current evidence	Next check
1	Approach Angle	Known / estimated / not checked	_____
2	Body Height	Known / estimated / not checked	_____
3	Two-Hand Pickup	Known / estimated / not checked	_____
4	One-Hand Pickup	Known / estimated / not checked	_____
5	Clean Transfer	Known / estimated / not checked	_____
6	Throw Decision	Known / estimated / not checked	_____

Scenario and Facilitation Starting Brief

- Frame: Which evidence separates throw decision from approach angle in this case? Frame a bounded scenario with a clear success measure.
- Assign: How does body height change the interpretation of two-hand pickup? Assign roles, resources and stop conditions.
- Run: What boundary on one-hand pickup must be checked before relying on clean transfer? Run the scenario without adding hidden rules.
- Capture: Which observation links approach angle to one-hand pickup, and what remains uncertain? Capture decisions, timing and exceptions.
- Debrief: What alternative explanation could account for both two-hand pickup and throw decision? Debrief actions with evidence and balanced participation.
- Edition success means: run and review the scenario with a reason for each adjustment

Technique Observation Worksheet

This format is designed to help a player or coach describe movement without vague labels. For ground fielding, apply the method in a deliberate sequence: watch from a safe position, note one cue and compare repeated attempts. The edition target is plan a match scenario, so each entry should show what was noticed, what was tried and what changed.

Working step	What to record	Evidence or source	Status
Frame Throw Decision	Which evidence separates throw decision from approach angle in this case?	Scenario brief / date	Open / checked
Assign Approach Angle	How does body height change the interpretation of two-hand pickup?	Role map / date	Open / checked
Run Body Height	What boundary on one-hand pickup must be checked before relying on clean transfer?	Scenario run / date	Open / checked
Capture Two-Hand Pickup	Which observation links approach angle to one-hand pickup, and what remains uncertain?	Event record / date	Open / checked
Debrief One-Hand Pickup	What alternative explanation could account for both two-hand pickup and throw decision?	Debrief / date	Open / checked
Transfer Clean Transfer	What next check on clean transfer would make the record about body height more useful?	Transfer plan / date	Open / checked

Completion Standard

- Keep the work tied to ground fielding, not to a vague general intention.
- Apply this adjustment: define the situation, roles, field and success measure
- Which decision from the scenario should change the next real attempt?
- Expose this outcome risk if it appears: roles or stop conditions are unclear.
- Use original notes and explanations; quote only when necessary, lawful and properly attributed.
- Ask a qualified coach, safeguarding lead or health professional to challenge one material assumption where appropriate.
- Close with one decision and one follow-up rather than an unranked list of ideas.

Working Note

Edition CRIC-19-03-08 pairs technique observation worksheet with the outcome 'Plan a Match Scenario'. That pairing is the boundary for this workbook: material that does not help that outcome belongs in a separate record.

Guided Session x Scenario and Facilitation Focused Practice Lab

This lab pairs a guided session method with a scenario and facilitation outcome lens. Work through the six actions to turn the subject focus - close space, stay balanced and choose a collection method suited to the ball - into evidence for plan a match scenario. Preserve any gap that prevents a supported conclusion.

#	Action	Constraint	Record
1	Frame / Frame two-hand pickup	Which evidence separates throw decision from approach angle in this case? Frame a bounded scenario with a clear success measure.	Readiness / Scenario brief
2	Prompt / Assign one-hand pickup	How does body height change the interpretation of two-hand pickup? Assign roles, resources and stop conditions.	Brief / Role map
3	Observe / Run clean transfer	What boundary on one-hand pickup must be checked before relying on clean transfer? Run the scenario without adding hidden rules.	Observation / Scenario run
4	Listen / Capture throw decision	Which observation links approach angle to one-hand pickup, and what remains uncertain? Capture decisions, timing and exceptions.	Response / Event record
5	Summarise / Debrief approach angle	What alternative explanation could account for both two-hand pickup and throw decision? Debrief actions with evidence and balanced participation.	Access check / Debrief
6	Close / Transfer body height	What next check on clean transfer would make the record about body height more useful? Transfer the learning into the next owned action.	Close / Transfer plan

Common Failure Modes

- For two-hand pickup, watch for a participant misunderstands the task together with the scenario lacks a boundary.
- For one-hand pickup, watch for the first observation is incomplete together with roles or stop conditions are unclear.
- For clean transfer, watch for one voice dominates together with hidden rules appear during the run.
- For throw decision, watch for comfort or access changes together with only the final result is captured.
- For approach angle, watch for feedback conflicts together with the debrief becomes blame.

Independent Review Question

Format question: What changed between the first observation and the considered response? Outcome question: Which decision from the scenario should change the next real attempt? Ask a qualified coach, safeguarding lead or health professional where appropriate, then answer before the next practice block: _____

Cricket Practice Plan for Plan a Match Scenario

Use one defined practice block to test the outcome rather than attempting every possible task. This edition pairs guided session with scenario and facilitation to pursue this objective: turn scoreboard and resources into a bounded tactical plan. Preserve the starting condition and both evidence trails.

Plan field	Entry
Purpose	Plan a Match Scenario
Starting condition	_____
Chosen working area	_____
Event record	define the situation, roles, field and success measure
Evidence to capture	_____
Stop or review condition	_____

Thirty Minute Practice Shape

Stage	Action	Evidence
0-5 min	Which evidence separates throw decision from approach angle in this case? Prepare the setting and participants.	Readiness / Scenario brief
5-10 min	How does body height change the interpretation of two-hand pickup? Explain the focus and response method.	Brief / Role map
10-18 min	What boundary on one-hand pickup must be checked before relying on clean transfer? Run a first observation without interruption.	Observation / Scenario run
18-24 min	Which observation links approach angle to one-hand pickup, and what remains uncertain? Invite and record a considered response.	Response / Event record
24-27 min	What alternative explanation could account for both two-hand pickup and throw decision? Check comfort, access and understanding.	Access check / Debrief
27-30 min	What next check on clean transfer would make the record about body height more useful? Summarise learning and follow-up.	Close / Transfer plan

Guided Observation Log

Guided Observation	Condition	Observation	Decision
1	Same / changed	_____	Keep / change / check
2	Same / changed	_____	Keep / change / check
3	Same / changed	_____	Keep / change / check
4	Same / changed	_____	Keep / change / check
5	Same / changed	_____	Keep / change / check

Observation and Response Review - Scenario and Facilitation Lens

This comparison tests ground fielding against plan a match scenario through two independent questions. Format: What changed between the first observation and the considered response? Outcome: Which decision from the scenario should change the next real attempt? Record material setting differences instead of averaging them away.

Evidence area	Baseline	Alternative	Interpretation prompt
One-Hand Pickup	_____	_____	Which evidence separates throw decision from approach angle in this case?
Clean Transfer	_____	_____	How does body height change the interpretation of two-hand pickup?
Throw Decision	_____	_____	What boundary on one-hand pickup must be checked before relying on clean transfer?
Approach Angle	_____	_____	Which observation links approach angle to one-hand pickup, and what remains uncertain?
Body Height	_____	_____	What alternative explanation could account for both two-hand pickup and throw decision?
Two-Hand Pickup	_____	_____	What next check on clean transfer would make the record about body height more useful?

Format Decision Test

Field	Record
Review question	What changed between the first observation and the considered response?
Outcome question	Which decision from the scenario should change the next real attempt?
Acceptance lens	run and review the scenario with a reason for each adjustment
Conditions held steady	_____
Evidence supporting the choice	_____
Evidence against the choice	_____

Guided Session Confidence Check

- Scenario brief: what was actually seen, heard, measured or read?
- Format evidence: which record best demonstrates responses captured?
- Outcome evidence: which record best demonstrates roles assigned?
- Challenge: could only the final result is captured explain the result?
- Subject boundary: what does this comparison leave unresolved about throw decision?

Guided Session x Scenario and Facilitation Scenario Cards

Use these paired scenarios to rehearse judgement for plan a match scenario. Each card joins a guided session failure mode to an outcome-specific risk. State what remains open and which evidence named in the final column should be collected next.

#	Situation	Review question	Decision
1	Throw Decision: one voice dominates.	Which evidence separates throw decision from approach angle in this case?	Scenario brief
2	Approach Angle: comfort or access changes.	How does body height change the interpretation of two-hand pickup?	Role map
3	Body Height: feedback conflicts.	What boundary on one-hand pickup must be checked before relying on clean transfer?	Scenario run
4	Two-Hand Pickup: the close-out is rushed.	Which observation links approach angle to one-hand pickup, and what remains uncertain?	Event record
5	One-Hand Pickup: a participant misunderstands the task.	What alternative explanation could account for both two-hand pickup and throw decision?	Debrief
6	Clean Transfer: the first observation is incomplete.	What next check on clean transfer would make the record about body height more useful?	Transfer plan

Decision Record

Field	Notes
Chosen format scenario	_____
Outcome lens	Which decision from the scenario should change the next real attempt?
Evidence available	_____
Evidence missing	_____
Controlled next step	_____
Person / review date	_____

Eight Guided Session and Scenario and Facilitation Evidence Tracker

Track plan a match scenario across eight practice blocks using the guided session method and the scenario and facilitation outcome lens. Keep conditions visible and use this review question: Which decision from the scenario should change the next real attempt?

#	Focus	Condition	Result	Next action
1	Clean Transfer	_____	_____	_____
2	Throw Decision	_____	_____	_____
3	Approach Angle	_____	_____	_____
4	Body Height	_____	_____	_____
5	Two-Hand Pickup	_____	_____	_____
6	One-Hand Pickup	_____	_____	_____
7	Clean Transfer	_____	_____	_____
8	Throw Decision	_____	_____	_____

Guided Session Evidence Dashboard

Measure	Baseline	Current	Evidence location
Approach Angle: Participants Briefed / Scenarios Framed	_____	_____	_____
Body Height: Observations Recorded / Roles Assigned	_____	_____	_____
Two-Hand Pickup: Responses Captured / Runs Completed	_____	_____	_____
One-Hand Pickup: Access Checks Completed / Events Captured	_____	_____	_____
Clean Transfer: Misunderstandings Resolved / Debriefs Evidenced	_____	_____	_____
Throw Decision: Follow-Ups Assigned / Learning Transferred	_____	_____	_____

Interpret the Trend

- I kept the scenario rules and success measure visible throughout the run.
- I converted the debrief into a specific action with an owner.
- Keep the method only when the evidence for plan a match scenario improves without hiding only the final result is captured.
- What boundary on one-hand pickup must be checked before relying on clean transfer?
- Use a qualified coach, safeguarding lead or health professional when the evidence crosses a safety, rights, health or authority boundary.

Guided Session x Scenario and Facilitation Next Step Plan

Finish by turning the paired format and outcome record into one owned action. For this technique observation worksheet, the intended result was plan a match scenario; the outcome test is: Which decision from the scenario should change the next real attempt? The close-out standard remains: run and review the scenario with a reason for each adjustment.

Close-out field	Record
Most useful evidence	_____
Important limitation	_____
Decision	Keep / adapt / pause / seek review
Next action	_____
Owner and date	_____
Evidence location	_____

Completion Review

- Subject check: Which evidence separates throw decision from approach angle in this case?
- Subject check: How does body height change the interpretation of two-hand pickup?
- Format check: I separated my observation from the participant's explanation.
- Outcome check: I converted the debrief into a specific action with an owner.
- I used a progressive warm-up and did not ignore pain, unsafe surfaces, heat or fatigue.
- I kept the drill generic and did not imply affiliation with a player, team, league or governing body.

Originality and Responsible Use

Original independent resource. This general practice, observation and review aid was written specifically for asset CRIC-19-03-08. It does not reproduce a book passage, manual, official form, commercial question bank, branded training plan, broadcast, photograph, logo, artwork, map, proprietary diagram or third-party worksheet. Any user-added quotation, image, question or source material remains the user's responsibility and may require attribution or permission.

Educational use only. Verify current facts, rules, competition requirements, local regulations, health and safety conditions with authoritative sources and a suitably qualified person where consequences matter.
